Die Ölversorgung mit
OEG Gerätebau GmbH
Der sicherste Weg zwischen
Tank und Brenner

technical - data sheet

Order no.
120516030

Designation:
SMG 1603, OEG motor pump group

Description:

For light or heavy heating oil
Viscosity: max 80mm²/s
Temperature: up to 180° C
Pressure variation in operation and
on restart: max 5% of set pressure
Max pressure in feed line: 4 bar
Internal gear pump, with built-in pressure
regulating valve, return to tank feature,
self-priming, with shaft-seal
Three-phase current-foot and flange motor
Rotation direction:
(looking on the shaft end):
DC = right, clock wise
IC = left, anti clock wise
On standard at the motor-pump-groups
is a DC pump mounted
Pressure regulating valve:
Pressure range: with spez. spring 2: 2 to 9 bar
TÜV-checked at DIN 4736
Pressure max. 9 bar
Max. under pressure in suction line: -0,6 bar,
risk of air/gas separation below -0,4 bar
Pump-type: VBRG
Swept volume: 120 l/h at 6 bar
Connection: G: 3/8"
Power rating: 0,18 kW;
Operating voltage: 240/400 V, 50 Hz
Speed: 1400 min⁻¹, System of protection: IP 54
Manufacture: OEG Gerätebau GmbH
