

# Suction/pressure cleaner

---

## Intended use

The OEG suction/pressure cleaner is used for flushing pipes and for chemical-free clearance of pipe blockages.

## Accessories

Small adapter for sinks, washbasins and smaller drains

Large adapter for sinks, washbasins and larger drains

Adapter for toilets

## Application

Attach the appropriate accessory depending on the intended purpose. Attach the large sink adapter by inserting it directly into the smaller one.

### Step 1:

- Pull the handle of the suction/pressure cleaner to draw in water.

### Step 2:

- Place the the bottom part of the suction/pressure cleaner onto the drain.

### Step 3:

- Hold the cartridge of the suction/pressure cleaner firmly in your hands.
- Thrust the handle down to create a powerful water jet.
- If necessary, hold the device at an angle to avoid the faucet.
- Repeat steps 1 to 3 if required.
- Clean the pump by flushing it with fresh water.
