

CABLE WRAPTOR™

Does what it promises!

The Wraptor is a reclosable cable tie with a few special advantages compared to ordinary cable ties.

Because of the clever design, not only can cables be bundled but also extensions, ropes, chains, hoses and the like. The ergonomic carrying handle means that the bundled items can be carried in comfort and the hole in the handle means they can also easily be hung up on a nail or hook.

A large, well-placed release button allows the Wraptor to be opened quickly with one finger. No tools are required and the Wraptor can be re-used over and over again.

The Wraptor is available in 3 different sizes and, depending on the version, has a load capacity of 40kg in S and L or up to 90kg in XL.
