Pure+ Fresh-Water storage tank 150 litres with 2 smooth pipe heat exchangers

Fresh-water storage tank for highest demands on drinking water hygiene and energy efficiency.

The structure of the storage tank is fundamentally different from usual large-volume domestic hot-water tanks. A built-in corrugated stainless steel pipe separates the drinking water from the heating water, while serving as a powerful heat exchanger at the same time. Thus, the advantages of a buffer tank are combined with those of a continuous flow water heater. The heating water serves as actual heat storage while the drinking water flows through the corrugated stainless steel pipe only if required and, thus, a legionella-safe domestic water heating is ensured. You do not need a protection programme against legionella in the controller. At all times, the consumer is provided with hygienically clean, fresh water at the desired temperature.

Due to the two additional smooth-pipe heat exchangers, more heat generators can be integrated at any time and their energy can be fed into the fresh-water storage tank.

Data pursuant to EU regulation 812/2013

OEG GmbH
516008288 - Fresh-Water storage tank 150 litres with 2 smooth pipe heat exchangers
A+
28

General

OEG Nr.:	516008288
Rated volume according to EN 12897:	150
Colour:	blue
Insulation according to DIN 4102-1 Fire Protection Class B2:	solid foamed insulation
Weight [kg]:	75
Total height including insulation [mm]:	1020
Diameter with insulation [mm]:	610
Tilt height [mm]:	1170

Energy

Energy efficiency class according to EU regulation no. 812/2013:	A+
Heat retaining loss according to EN 12897 [W]:	28
Heat losses in stand-by mode according to DIN 12897 [kW/h / 24 h]:	0,672
Output capacity (45°C) [I]:	85
Performance indicator NL following DIN 4708:	1
