Pure+ Fresh-water storage tank 500 litres

Fresh-water storage tank for highest demands on drinking water hygiene and energy efficiency.

The structure of the storage tank is fundamentally different from usual large-volume domestic hot-water tanks. A built-in corrugated stainless steel pipe separates the drinking water from the heating water, while serving as a powerful heat exchanger at the same time. Thus, the advantages of a buffer tank are combined with those of a continuous flow water heater. The heating water serves as actual heat storage while the drinking water flows through the corrugated stainless steel pipe only if required and, thus, a legionella-safe domestic water heating is ensured. You do not need a protection programme against legionella in the controller. At all times, the consumer is provided with hygienically clean, fresh water at the desired temperature.

Data pursuant to EU regulation 812/2013

Performance indicator NL following DIN 4708:

Name of supplier's trade marks:

| Model identification of the supplier: | 516008228 - Fresh-water storage tank 500 litres |
|--|---|
| Heat retaininglosses in watts: | 43 |
| Storage tank volume in litres: | 514 |
| General | |
| OEG Nr.: | 516008228 |
| Rated volume according to EN 12897: | 500 |
| Colour: | blue |
| Insulation according to DIN 4102-1 Fire Protection Class B2: | solid foamed insulation |
| Weight [kg]: | 111 |
| Total height including insulation [mm]: | 1770 |
| Diameter with insulation [mm]: | 760 |
| Tilt height [mm]: | 1925 |
| Energy | |
| Heat retaining loss according to EN 12897 [W]: | 43 |
| Heat losses in stand-by mode according to DIN 12897 [kW/h / 24 h]: | 1,032 |
| Output capacity (45°C) [I]: | 285 |
