Pure+ Fresh-water storage tank 5,000 litres with 2 smooth pipe heat exchangers

Fresh-water storage tank for highest demands on drinking water hygiene and energy efficiency.

The structure of the storage tank is fundamentally different from usual large-volume domestic hot-water tanks. A built-in corrugated stainless steel pipe separates the drinking water from the heating water, while serving as a powerful heat exchanger at the same time. Thus, the advantages of a buffer tank are combined with those of a continuous flow water heater. The heating water serves as actual heat storage while the drinking water flows through the corrugated stainless steel pipe only if required and, thus, a legionella-safe domestic water heating is ensured. You do not need a protection programme against legionella in the controller. At all times, the consumer is provided with hygienically clean, fresh water at the desired temperature.

Due to the two additional smooth-pipe heat exchangers, more heat generators can be integrated at any time and their energy can be fed into the fresh-water storage tank.

Pure+ Fresh-water storage tank 5,000 litres with 2 smooth pipe heat exchangers

Smooth-pipe heat exchanger

Smooth-pipe heat exchanger [number]:	2	
Smooth-pipe heat exchanger area bottom [m ²]:	7,80	
Smooth-pipe heat exchanger area top [m ²]:	7,80	
Smooth-pipe heat exchanger volume bottom:	51	
Smooth-pipe heat exchanger volume top:	51	
p _{max} Smooth-pipe heat exchanger [bar]:	10	
t _{max} Smooth-pipe heat exchanger [°C]:	130	

Connections

Connection layout:	90°
Connection sensor [Ø mm / terminal]:	6 mm
Connection cold / hot water:	R 1 1/4"
Connection heat generator [thread]:	Rp 1 1/2"
Connection heat exchanger [thread]:	Rp 1"
Max. immersion depth of screw-in heater [mm]:	1650
