### Additional information

Substances of Very High Concern – SVHC: Substances are not contained or are below 0,1%. For full text of Hazard statements: See SECTION 16.

#### **SECTION 4: First aid measures**

- Description of first aid measures 4.1 General information Change soaked clothing. Following inhalation Ensure supply of fresh air. In the event of symptoms seek medical treatment. Following skin contact In case of contact with skin wash off with warm water. Consult a doctor if skin irritation persists. Following eye contact Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice / attention. Following ingestion Get the medical advice. Rinse out mouth and give plenty of water to drink. Do not induce vomiting. 4.2 Most important symptoms and effects, both acute and delayed physician's information / possible symptoms.
- 4.3 Indication of any immediate medical attention and special treatment needed treatment (advice to doctor) Symptomatically treat. Provide the Safety Data Sheet for the doctor.

#### **SECTION 5: Firefighting measures**

Symptoms: corrosive effects.

#### 5.1 Extinguishing media

Suitable extinguishing media Product is not flammable. Fire extinguishing method of surrounding areas must be considered

Unsuitable extinguishing media Full water jet.

- 5.2 Special hazards arising from the substance or mixture In the event of fire the following can be released: Nitrogen oxides (NO<sub>x</sub>), Sulphur oxides (SO<sub>x</sub>).
- 5.3 Advice for fire-fighters
   Use self-contained breathing apparatus.

   Additional information
   Fire residues and contaminated fire extinguishing water must be disposed in accordance with the local regulations.

## **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures High risk of slipping due to leakage / spillage of product. Use personal protective clothing.

#### 6.2 Environmental precautions

Prevent spread over a wide area (e.g. by containment or oil barriers). Do not discharge into the drains / surface waters /groundwater.

- 6.3 Methods and material for containment and cleaning up Pick up with absorbent material (e.g. acid binders). Dispose of absorbed material in accordance within the regulations.
- 6.4 Reference to other sections See SECTION 8 + 13.

#### SECTION 7: Handling and storage

- 7.1 Precautions for safe handling Advice on safe handling Use only in well-ventilated areas. Avoid spilling or spraying in enclosed areas.
   Do not eat, drink or smoke when using this product. Wash hands before breaks and after work. Use barrier skin cream.
   Contaminated work clothing should not be allowed out of the workplace. Take off contaminated clothing and wash before reuse.
- 7.2 Conditions for safe storage, including any incompatibilities Requirements for storage rooms and vessels Keep only in original container. Keep in an area equipped with acid resistant flooring. Prevent penetration into the ground.

Advice on storage compatibility

Do not store together with oxidizing agents. Dot not store with alkalies.

Further information on storage conditions Keep container in a well-ventilates place. Keep container tightly closed.

German storage class 8B Non-combustible corrosive substances

7.3 Specific end use(s) No relevant information available.

SECTION 8: Exposure controls / personal protection

8.1 Control parameters Ingredients with occupational exposure limits to be monitored (EU / GB)

## 8.2 Exposure controls

Appropriate engineering controls Ensure adequate ventilation at the workplace.

Personal protection equipment Eye protection Safety glasses

#### Hand protection

The details concerned are recommendations. Please contact the glove supplier for further information. In full contact: > 0,7mm, butyl-rubber, > 480min (EN 374). In short contact: > 0,7mm, nitrile rubber, > 480min (EN 374).

#### **Personal Protection**

Protective work clothing.

#### Other protection measures

Personal protective equipment should be selected specifically for the working place, depending on concentration and quantity handled. The resistance of this equipment to chemicals should be ascertained with the respective supplier. Avoid contact with eyes and skin. Do not inhale gases / vapours / aerosols.

#### Respiratory protection

Respiratory protection mask in the event of high concentrations. Short term: filter apparatus: E-P2

#### Thermal Hazards

9.1

No information available.

Information on environmental protection regulations Comply with applicable environmental regulations limiting discharge to air, water and soil.

9.2 Other information No further relevant information available.

#### SECTION 10: Stability and reactivity

- 10.1 Reactivity See SECTION 10.3.
- 10.2 Chemical stability Thermal decomposition / conditions to be avoided Stable under normal ambient conditions (ambient temperature).
- 10.3 Possibility of hazardous reactions Reactions with alkali metals, oxidizing agents and with metals to form hydrogens.
- **10.4 Conditions to avoid** Strong heating.
- **10.5 Incompatible materials** Different metals.
- 10.6 Hazardous decomposition products Thermal decomposition No hazardous decomposition products known.

### 12.2 Persistence and degradability

Behaviour in environment compartments No information available. Behaviour in sewage plant This product is an acid, before discharging sewage into sewage treatment plants, neutralization is usually required. Biological degradability The surfactants are contained.

#### 12.3 Bioaccumulative potential No further relevant information available.

**12.4 Mobility in soil** No further relevant information available.

12.5 Results of PBT and vPvB assessment PBT: Not applicable. vPvB: Not applicable.

12.6 Other adverse effects Ecological data of complete product are not available.

#### SECTION 13: Disposal considerations

#### 13.1 Waste treatment methods

Waste material must be disposed of in accordance with the Directive on waste 2008/98/EC as well as other national and local regulations. It is not possible to determine a waste code for this product in accordance with the European Waste Catalogue (EWC) since it is only possible to classify it according to how it is used by the customer. The waste code is to be determined within the EU in liaison with the waste-disposal operator.

#### Product disposal (recommended)

Coordinate disposal with the authorities if necessary. Dispose of as hazardous waste. Waste code (recommended) 060106\* other acids Version: 01

#### Packaging disposal (recommended)

Packaging that cannot be cleaned should be disposed of as for product. Contaminated packaging should be emptied as far as possible and after appropriate cleansing may be taken for reuse. **Waste code (recommended)** 

150110\* packaging containing residues of or contaminated by dangerous substances.
