

Protective gloves that are certified in accordance with the extended test methods of EN 511 are marked as follows:

Performance levels	0	1	2	3	4
Resistance against convective cold (thermal insulation I_n in $m^2 K/W$)	1	2	3	4	5
Resistance against contact cold (thermal resistance R in $m^2 K/W$)	1	2	3	4	5
Test for water permeability (0 = water penetration, 1 = no water penetration)	0	1
